Drop user

Drop, Delete, Remove a MariaDb user

- IMPORTANT NOTES
  - Do not *delete* a user from the *mysql.user* table, but use the *drop* command
  - After *drop*ping a user, it appears you need to use *flush privileges* before recreating the user
- Drop a user
  - DROP USER 'user1'@localhost;
  - FLUSH PRIVILEGES;
- Create a new database
  - CREATE DATABASE <databaseName> CHARACTER SET utf8mb4 COLLATE utf8mb4_unicode_ci;
- Create a new user and grant privileges
  - CREATE USER <username>@localhost IDENTIFIED BY '<password>';
  - GRANT SELECT, INSERT, UPDATE, DELETE, CREATE, DROP, INDEX, ALTER, CREATE TEMPORARY TABLES ON <dbName>.*
    TO '<userName>'@'localhost' IDENTIFIED BY '<password>';
  - FLUSH PRIVILEGES
